Intoxications with new drugs: epidemiology, detection, toxicokinetics and treatment

**14th International Congress of
Therapeutic Drug Monitoring & Clinical Toxicology**
11-15 October 2015 | Rotterdam, The Netherlands
ALL TIME HIGH BELOW SEA LEVEL

Sunday 11 October 2015, De Doelen, Rotterdam, the Netherlands

Pre-conference and post-academic training in clinical toxicology

The pre-conference will be organized around the theme “All Time High Below Sea Level”.

The topic includes toxicology and treatment of new drugs. The focus will be on the recognition of various toxidromes, laboratory detection, epidemiology, toxicokinetics and treatment.

This conference is of interest for: participants of the IATDMCT2015 conference, emergency room physicians, internal medicine physicians, intensive care physicians, clinical and forensic toxicologists, hospital pharmacists, clinical chemists, clinical and forensic pathologists.

Accreditation is requested for 6-8 hours (NIV, NVIC, NVKFB, NVZA, KNMP).
